

## Latest Advances

At JKO we strive to provide the best training and education tools and resources to ensure the competitive advantage of the Joint Force. This latest release reflects the JKO Team commitment to continuous improvement. Most importantly, the 9.5 release strengthens the JKO cyber posture by virtue of our work with DDJT EOD Cyber Security and the Army Research Lab to meet current cyber security requirements and best practices. At the same time, the software and framework upgrades allowed us to modernize the user interface and integrate responsive web design capability which optimizes presentation across devices - desktop, laptop, tablets and smartphones. And most noticeably, updating with a brand refresh including new logo, color pallet and buttonology. We felt this is an opportune time to refresh our brand and communications with stakeholders to reiterate our commitment to continuous improvement.
